

Ph.D. Student Positions in Computer Architecture or Compilers

The Architecture and Compilers (ARCO) Research Group of the Universitat Politècnica de Catalunya at Barcelona (Spain) is seeking for students interested in pursuing a PhD in the area of Computer Architecture or Compilers.

We are looking for bright and motivated students with a Bachelor or Master degree.

Students will be working in the ARCO research group. We offer a leading-edge environment for research, with strong links with worldwide academia and industry. The group is recognized as one of the worldwide top research groups in the areas of computer architecture and compilers. It has numerous publications in the top symposia and journals, and many collaborations with industry.

Students will be provided with grants that cover their tuition and a monthly stipend for the Master (not needed if the candidate has already a master in a related area) and PhD studies.

Interested candidates, please Email your resume to Prof. Antonio González, at antonio@ac.upc.edu.
